

## Hot Shrink Film Packing Machine

Available Range :

Character:

- It adopts the international famous PLC program, control the operation automatically ;
- It has automatic function such as conveying material, unscrambling, Shrinking and cooling ;
- The film conveying adopts the imported transducer control in order to reach the stepless speed conversion;
- It uses the enhanced cooling and design finalizing passage which can make products packing

finalize the design more quickly and easy to be stored and transported

Dimension	5050*3300*2100mm
Hot Shrink Passage Dimension	3700*920*1800mm
Max. Packing Dimension	600*400*350mm
Packing Speed	8-12
Height of Conveying Belt	920mm(可调200mm)
Power	380V/20KW 三相
Working Pressure	0.6-0.8Mpa
